# Gorell 4200 Series Storm Doors Provide Greater Protection and an Expansive View.

## PROTECT YOUR HOME.

Gorell storm doors are the perfect solution for protecting your entry door—and home—from the elements. They keep rain, snow and wind from deteriorating your entrance—and they also protect holiday and seasonal decorations.

## MAKE YOUR HOME SAFER.

Gorell doors provide an element of safety everyone appreciates—especially families with children.

Every door is made with high-strength tempered glass to greatly reduce the likelihood of injury from accidental breakage. Our premium-quality locks help keep little ones from getting out when they shouldn't.

## ENJOY THE VIEW OF THE OUTDOORS.

Ask 10 people what they like most about their Gorell storm doors and nine will say, "The view!" Our doors—especially the ever-popular Full View models—let you open your entry doors and enjoy an expansive view of your yard or neighborhood without the worry of insects and bad weather.

## VERSATILITY AND FUNCTIONALITY

Gorell 4200 Series Storm Doors meet a wide range of needs. They can protect your home's entry door, provide a source of ventilation, add a level of safety or just give you a nice view of the neighborhood.

# Standard Features of 4200 Series Storm Doors

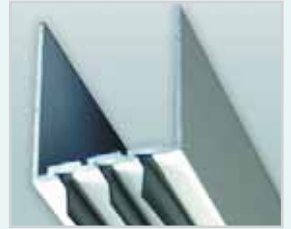

1. 3-3/4 inch-wide commercial-grade 6063T5 extruded aluminum frames in soft white provide an aesthetically pleasing appearance and exceptional durability.
2. Two layers of weather stripping around the Z-bar frame help stop air and moisture from entering your home—and provide a close-fitting seal.
3. Double-strength tempered safety glass, sealed in a marine glazing gasket, provides cushioning and a tight seal.
4. BetterVue™ screens—made of durable, fire-retardant fiberglass yarns—will give you a sharper view of the outdoors and added airflow for superb ventilation. (Screen not shown in photo.)
5. Vinyl glass retaining system adds a sleek, elegant look to your door.

storm door in soft white

### FULLY ADJUSTABLE BOTTOM EXPANDER

This extruded expander, which features triple weather stripping, helps to keep out drafts and moisture and creates a strong seal at the sill.

### HEAVY-DUTY EXTRUDED ALUMINUM GUSSETS

Located inside the door frame, these rugged gussets provide structural rigidity—“locking” the frame together to ensure durability and long door life.

6. Beautiful heavy-duty gold-anodized “piano” hinges ensure that these doors operate smoothly and reliably for decades.

7. Fully adjustable top and bottom pneumatic closers prevent uneven door operation and keep the door panel rigid and square.

### HARDWARE OPTIONS

Choose from two hardware options to give your new door just the right look:

- Traditional black push-button latches with optional key lock
- Polished brass mortise hardware with deadbolt and key lock.

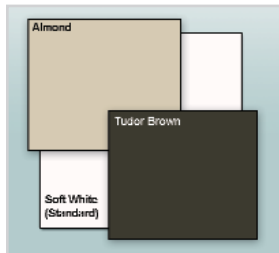

## Create an Unforgettable First Impression.

Quality-crafted Gorell storm doors exude elegance, style and taste to complement and enhance the appearance of your home. A myriad of distinctive door styles—and a variety of colors and hardware options—allow you to customize the look of your home's entrance to your own tastes and preferences.

### COLOR OPTIONS

Standard soft white, stylish almond or Tudor brown colors allow you to match or contrast your door to the look of your home.

### KICK PLATE OPTION

Foam-insulated kick plates that are available on several Gorell storm doors make them more energy-efficient.

### BRASS RETAINERS

Beautiful brass clip retainers, an exclusive Gorell design, ensure maximum rigidity and make glass or screen removal simple.

National ENERGY STAR® Partner of the Year every year since 2004.
