

6300 & 6400 Series
Sliding Patio Doors

All-new, exceptionally durable doors that deliver optimal security and energy efficiency.

Gorell Sliding Patio Doors offer exceptional protection, energy efficiency and more.

HELP KEEP ENERGY COSTS LOW.

Because of the amount of glass in them, patio doors are typically one of the least energy-efficient elements of your home. The thermal performance of Gorell 6300 and 6400 sliding doors, however, is exceptional. These remarkable doors help keep your home comfortable and your energy costs low. Practically all Gorell patio doors that include a Low-E glass system qualify for the ENERGY STAR® label.

ENJOY SUPERB SECURITY AND ASTONISHING BEAUTY.

Gorell 6300 and 6400 Series Sliding Patio Doors provide numerous additional benefits. You get real protection against intrusion because of the heavy-duty, keyed lock system and strong multi-chambered frame construction on these doors. A secondary lock is also available for even more protection.

These doors are as elegant as they are strong and—with all the design options available—you can further enhance their beauty to get just the right look for your home.

SELECT IMPACT-RATED DOORS FOR VIOLENT WEATHER.

6400 Series doors are in a class of their own because they are designed for use in areas prone to hurricanes and other violent weather. These doors have undergone rigorous testing—and have achieved the requirements necessary to pass ASTM Large Missile Impact tests.

Tough Armor Max Plus™ glass used in 6400 doors—with three panes of glass and a protective laminated interlayer—provides unyielding protection against airborne debris and other dangers from violent weather. The glass is inserted deep into the door frame and sealed to ensure a super-tight fit and tremendous strength.

Gorell is a proud member of the International Hurricane Protection Association.

National ENERGY STAR® Partner of the Year every year since 2004.

Gorell is proud to partner with the National Crime Prevention Council, offering secure, intruder-resistant windows and doors.

6300-6400 Sliding Patio Door

Standard Features

1. Expertly engineered and incredibly durable vinyl frame with multiple structural hollows gives this door exceptional strength and insulating properties.
2. Robotically sealed corners ensure the door panels stay square. They will protect your home from air and water.
3. Tough Armor Max Plus™ glass system—with three panes of glass and a protective laminated interlayer—provides exceptional protection against airborne debris and other dangers from violent weather. The glass is inserted deep into the door frame and sealed to ensure a super-tight fit and tremendous strength.
4. Premium-grade multiple weather seals are unique to this door's design, significantly reducing drafts and making the door more airtight.*
5. Heavy-duty, reinforced door panels are extraordinarily strong to provide unsurpassed durability.
6. Commercial-grade keylock hardware makes your door so strong and secure you can use it as your home's main entry.
7. Stainless steel hardware components will hold up to the harshest coastal conditions.
8. Elegantly styled handles with a stunning contour design fit the shape of your hand perfectly—and add more than a touch of class to your home.
9. Full-length interlocking panels give you optimal strength and security.*
10. Specially designed sill track enables the door panel to glide as if it were on air.*
11. The sloped sill is both beautiful and functional. It's easy to clean and is built to stand up to the rigors of everyday use.
12. Anodized aluminum sill track helps prevent corrosion, and it enables the door panel to glide as if it were on air.*

* Features not visible in photograph.

** Items in red are standard on 6400 Series doors.

13. Intercept® spacer system offers warm-edge glass technology and is proven to be one of the best systems for glass longevity.

14. 100 percent vinyl screen frames feature BetterVue™ screens that give you a clearer view of the outdoors—and the added airflow you'll get for ventilation is almost like having no screens at all.

15. Nylon tandem rollers make this door remarkably smooth and quiet to operate—as if it were on a carpet of velvet.

HIGH-PERFORMANCE GLASS SYSTEMS provide precisely the combination of comfort, thermal performance and security you desire for your family. Numerous glass systems are available for 6300 Series doors. (6400 Series doors incorporate a high-performance hurricane glass system.)

INTERBLINDS™ is an amazing between-the-glass™ solution that offers instant privacy, shade, comfort and beauty. (Available on 6300 Series.)

SECONDARY LOCK is an additional safety and security measure to further enhance resistance to intrusion.

INTERNAL GRIDS give your doors the look of traditional divided lites—yet allow for easy cleaning.

SOLARSHINE™ glass helps keep the exterior glass of your new doors looking cleaner forever because, remarkably, it uses the sun's rays to loosen and break down dirt from its ultra-smooth surface.

SIX INTERIOR HARDWARE COLORS provide additional elegance and sophistication to your beautiful doors: White, Almond, Polished Brass, Brushed Silver, Antique Brass, and Oil-Rubbed Bronze.

SIMULATED DIVIDED LITES allow you to historically replicate the appearance of true "divided-lite" doors to enhance your home's classic character.

Give Your Home a Unique, Personalized Look.

With Gorell patio doors, you don't have to sacrifice appearance for protection and security. These doors are custom made to your exact size requirements—so they'll fit your home perfectly. You can truly personalize the look of your door by choosing from a myriad of aesthetically pleasing options.

COLOR OPTIONS

A palette of beautiful colors is available so that you can coordinate or contrast your door to the colors of your home—inside and out. You can choose from several woodgrain finishes for the interior—giving you the exquisite appearance of real wood, without the maintenance. An unlimited array of exterior color options is also available for your new door. You can select one of Gorell's standard exterior colors, or have your door manufactured in virtually any custom color you request.
